License File Overview

Overview

To determine the number of User Accounts, Ports, and other options, including extra cost options, that have been set up for your **NexTalk** domain, go to License File in the Admin menu. The license file also shows your domain name and any special security settings that have been enabled for your account.

```
john smith - License
File view Help

Options

Menu Bar

File | Import...

This option allows you to import a new or updated license file.

File | Close

This option closes the License File module.

View | Always on Top

This option keeps the License File window in front of all other open windows.
