Video Settings Overview

Overview

The **Video Settings** module allows the NexTalk administrator to control the video server IP address and domain name. These are NexTalk domain wide settings.

Options

Menu Bar

File | Close

This option closes the Video Settings module.

View | Always on Top

This option keeps the Video Settings window in front of all other open windows.

Configuring Video Settings

Configure Video Settings

Open the **Video Settings** window from the Admin menu. Set the video server IP address and the video domain name for the NexTalk domain from this module.
